

## Tank & Pipeline All Under OneRoof

# Health Survey & Inspection Plant Layout Detail Drawing

Services : Other various specialized services such as

- ❖ Assessment of Storage Tank
- ❖ Eddy current testing of condenser tubes, feed water heater, heat exchanger tubes and air conditioners.
- ❖ Tube inspection with IRIS.
- ❖ Positive Material Alloy Identification (PAMI) in-situ metallurgy for the identification of metal / alloy type..
- ❖ Assessment of micro structural condition where removal of test specimen is not possible.
- ❖ Identification of metal corrosion under insulation (CUI)
- ❖ Material Identification (PMI) and Weld Inspection.
- ❖ Time of Flight Diffraction (TOFD) Test

GCG & GGS with its experienced in-house Level III Engineers, Metallurgist and other experts is able to provide customized solutions for client's inspection and NDT needs with a complete one-stop solution package, a single service team.

## Industrial NDT Consultancy

**CONSULTANCY :**

*We provide full suite of Nondestructive Testing (NDT)  
Third party engineering inspection  
Metallurgical Consultancy*

**NDT**

Defects in parts and products are expensive. The costs in rework time, raw material replacement, delayed schedules; lost sales and reputation damage affect your entire organization. Non-destructive Examination (NDE) can identify defects before they reach your clients, without damaging the sample material.

GCG & GGS offers comprehensive testing services in the area of Radiography Testing (RT), Digital Radiography / Radioscopy Ultrasonic Testing (UT), Magnetic Particle Testing (MPT) and Liquid Penetrant Testing (LPT).
